SUPER DX WILDCARD

The world's leading back-up and development system exclusively for Super Nintendo™.

fairlight

Put the power in your hands!

Thank you for your interest in the Super WildCard DX! This is the most amazing accessory you could ever imagine! And it's available TODAY for your Super Nintendo™!

The Super WildCard DX comes with 32 MBiT of memory, enough to accommodate the latest games! It also comes with a built-in 3,5" high density diskdrive! It will allow you to back-up your existing games to 3,5" disks and store your cartridges in a safe place! Protect your cartridge investments! Play games from disks!

But that's not all! This latest version of the WildCard series has expanded a whole new range of possibilities! How about being able to enter virtually ANY cheat-code available, and even find your own!? That's only the beginning!

How about being able to store multiple save-positions of those hard adventure games? Or being able to store your position *anywhere* in most games? Features abound!
